

How to set up a Seesaw account for more than one child

This guide is for anyone that has **more than one child** at school and how to create their Seesaw logins. There are two ways to do this.

Option one - You create separate logins using separate email addresses.

You will follow the steps in the previous guide for each child, each time using a different email address. This will mean each child will have their own account and login linked to just their class.

Make sure you use the correct class code for each child.

Option two – All children will use the same login with multiple classes linked.

If you cannot supply a different email address for each child, that is fine. You can set the account so it is linked with more than one class. It means all children will be linked to the same account and the name will be both or all of your children's names.

Follow the instructions below to add a different class to an account.

Create an account for one of your children following the steps in the first guide. Make sure you look at which child it is for by checking the class the email is for.

Go back to your email and open the message for your other child's class.

If you're using Seesaw for the first time:

1. Go to app.seesaw.me
2. Choose "I'm a Student"
3. Type in the code: **RYAJ FDEH**. *This code expires on April 29, 2020*
4. Finish creating your account using your school Google account or email address

Copy the **new** code from the email for you other child.

If you've used Seesaw before and have an account:

1. Go to app.seesaw.me
2. Choose "I'm a Student"
3. Sign in using your school Google account or email address
4. Click on your profile icon on the top left
5. Click on the +Join Class button
6. Type in the code: **RYAJ FDEH**. *This code expires on April 29, 2020*

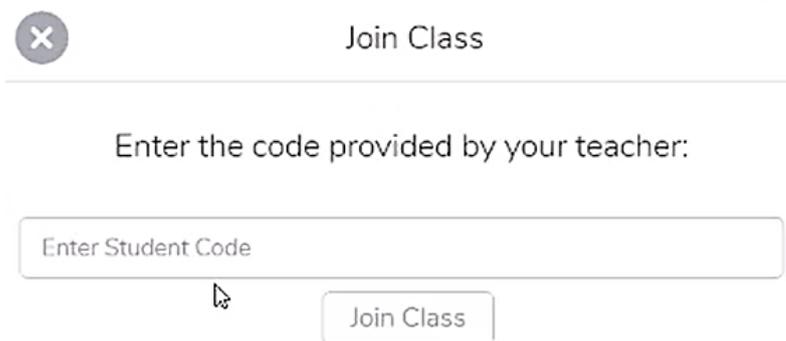

I'm excited to share our learning in Seesaw this year!
Lauren Sakalas

Go back to the Seesaw account you have already created and make sure you are logged in.

Click on the name bar at the top left of the screen.

You will then click the 'Join Class' button that appears.

When this pops up enter the **new code** for your other child's class.

Now when you click on the name box in the top left you will see both classes are now joined to the account.

Now we need to change the name of the account as it is still only under one child's name.

You need to click on the cog in the corner of name box.

Account Settings

PROFILE

First Name:

Last Name:

Display Name:

Icon: 

Email: testing_seesaw@outlook.com

Password:

CLASS NOTIFICATIONS

Email notifications

iOS/Android push notifications

Then this box will appear.

You have to change the first name to both children's names.

And then do the same for the display name.

This will save automatically so you can then press the cross.

 Join Class

 Planet Miss Sakalas 1

 Star Miss Sakalas

Now, whenever your child posts something new it will come up as both the children's name. Make sure that when one of your children posts something new it is in the correct class by selecting it from the menu.

A post will have both children's names but the class teacher will know which one of the children are in their class so will know who has sent them the post.

If you have more than two children at Wellfield, you will follow the instructions again but adding the next class and the next name to the login.
